

FUNCTIONAL AREAS

- The **Point of Sale (POS)** module identifies profit opportunities originating from losses due to fraud, process failures, lack of training, and non-compliance at the checkout and customer return process and assists in actualizing these opportunities.
- The **Inventory (INV)** module translates inventory information into item level profit opportunities, insights and trends, correlating it with KPIs like damage, shrink and waste to provide actionable solutions to increase profits.
- The **Delivery & Receiving (D&R)** module identifies and resolves profit increase opportunities related to the store's back door interface to the DCs, suppliers and other stores by correlating receiving, transfers and returns data with sales and inventory levels.
- The **Logistics & Warehouse (L&W)** module identifies and reclaims untapped profit opportunities generated during the handling of merchandise throughout the entire retail value chain, covering the warehouse interfaces with DCs, suppliers, carriers and stores.
- The **Procurement (PRO)** module monitors buyer and vendor performance to identify critical points that represent wrong or erred buying decisions, supplier favoring, fraud, or non-compliance to generate and actualize profit opportunities.

A Unique Opportunity

Profitect's profit-amplification solution enables you to quickly discover and actualize untapped profit opportunities across the entire retail value chain. Profitect's algorithms quickly identify measurable profit opportunities — returning intelligent, prioritized actions for increasing profit. Profitect commits to increasing your profits by more than **5%** within the first six months of use.

An Evolution in Optimizing Profits

Finally! An enterprise software solution that empowers retailers to rapidly, continuously and dynamically amplify profits identified across the entire retail value chain.

Grounded on more than 1,000+ man-years of experience applying proven detection techniques and a corporate legacy of data-driven, anti-terrorism anomaly detection to large retail operations, Profitect is an innovator of transactional analysis technology for profit amplification.

Profitect gives retail enterprises an automatically targeted map for quickly discovering and reclaiming untapped profits that exist across the organization.

Unparalleled Success

With 100% satisfaction in customer installations, Profitect consistently fulfills its commitment to deliver more than 5% profit-increase within six months. Successful customer profit increases include:

- **A \$17B department store reduced purchasing costs by \$300M without impacting operations and sales, after only three months of using the Profitect Purchasing module.**
- **A \$3B grocery retailer delivered \$11M in additional profits to shareholders in one year, by using Profitect's Delivery & Receiving module.**
- **A \$3B department store rang up \$5M to the bottom line, within 6 months, with Profitect's Point of Sale module.**
- **A \$3B cash & carry retailer shelved \$5.4M in 'found' profits in just 6 months, with Profitect's Inventory module.**
- **A \$6.2B grocer transferred \$3.1M from losses to profits, in six months, by using Profitect Logistics module.**

Understand Where Your Profit Opportunities Lie
